SUMMARY

Innovative and results-driven **Computer Programming & Analysis** student at Georgian College, pursuing an Advanced Diploma, with hands-on experience developing full-stack applications, optimizing databases, and building secure, scalable web solutions. Proficient in HTML, CSS, JavaScript, ReactJS, Django, SQL, Java and cloud deployment. Eager to apply my technical skills and problem-solving abilities in a collaborative co-op role.

TECHNICAL SKILLS

- **Programming & Scripting:** Java, Python, SQL, JavaScript, Linux scripting (familiar),

- **Web & Frameworks**: HTML5, CSS3, ReactJS, Bootstrap, Django

- **Development Environments**: Windows-based; experienced developing, testing, and deploying applications

- **Backend Development**: OOP principles, backend logic optimization

- **Cloud Services**: Azure (introductory knowledge)

- **Databases:** SQL Server, MySQL; schema design, indexing, query optimization

- **Tools & Version Control:** Git, GitHub, Visual Studio, VS Code

- **SDLC Methodologies:** Agile; requirements translation, functional specifications, technical design documents, code reviews, unit testing, troubleshooting, performance tuning

- **Web Technologies:** Cross-browser development, responsive design

- **Productivity Tools:** Strong MS Office (Word, Outlook, Excel, PowerPoint) for documentation (technical, process), presentations, planning, functional specification

COMMUNICATION AND OTHER SKILLS

- Strong analytical thinking: able to break down problems and draw logical conclusions
- Clear communicator with experience translating technical concepts for non-technical users
- Adaptable, self-driven learner who embraces new technologies and process improvements
- Collaborative team member with a proactive learning mindset and well experienced in fast-paced, dynamic environments
- Customer-focused problem solver with strong attention to detail
- Curious mindset aligned with innovation, continuous improvement, and secure digital practices
- Ability to understand client requirements and translate them into technical specifications

EDUCATION

Computer Programming and Analysis (CO-OP)   05/2024 – 04/2027

Georgian College, Barrie, ON

- Coursework in Java, JavaScript, Python, SQL, HTML/CSS, data systems, and web development
- Projects involving debugging, troubleshooting, responsive UI design, and system development

PROFESSIONAL EXPERIENCE

Junior Web Developer Intern   12/2023 – 03/2024
Information Technology Center
Anand, Gujarat, India

- Designed and developed a Student Feedback System using Django, SQL, HTML, CSS, and JavaScript, enabling 100+ students to submit feedback online each term.
- Built a mobile-optimized feedback portal with QR code access that reduced average submission time by approximately 60% and increased overall student participation by about 40%.
- Created dashboards with interactive charts and tables that allowed administrators to review feedback trends in under 5 minutes compared to manual review taking 20+ minutes.
- Implemented automated email notifications using Python, improving engagement in online forums by roughly 60% and reducing manual follow-up effort for staff.
- Optimized database queries and backend logic, decreasing page load time by around 30% and improving overall user experience for all active users.
- Contributed to code reviews, unit testing, and documentation for multiple features, helping reduce post-release issues and improving maintainability of the codebase.
- Demonstrated initiative by exploring UI improvements and best practices aligned with workflow-based system design
- Supported deployment of non-production code and contributed to workflow automation scripts.

WORK EXPERIENCE

Team Member / Customer Service Representative   10/2024 – 01/2026
Domino's

Barrie, ON
To maintain seamless and effective restaurant operations, oversaw daily operations, controlled inventory, trained workers, made sure safety standards were followed, handled customer service, and processed payments.

- Maintained accurate operational data logs and inventory records, reducing product shortages by 15%.
- Enhanced team efficiency and communication by coordinating real-time workflow adjustments during peak hours.
- Gained hands-on experience analyzing daily performance data and customer-focused problem-solving under pressure in a high-volume environment.

CERTIFICATES
- Introduction To Networks - **Cisco**
- Programming in JavaScript - **Meta**
- Version Control using Git and Github – **Meta**
- React Basics – **Meta**
